BE THINK

Innovate is our promise to add value to our customers and partners.

BE THINK innovate is our promise to ensure reliable operations.

BE THINK innovate is our promise to contribute to global sustainability.

PUMP

Our values, Our strategy, Our company

People. Passion. Performance.

It is these three success factors that make us the company it is today. Optimising proven technology, trying out new things, devising creative solutions and adapting to different markets with inspiring ideas. This has been firmly rooted in our DNA for years.

Why work with us?

- ✓ Our customers can rely on us to tackle and solve any challenge by leveraging on our market knowledge, understanding of customer requirements, decades of experience in supplying pumps and valves.
- ✓ All supplied products are supplied according to the international standards.
- ✓ The virtually endless range of standard and customized variable brands pumps by "BARAZMAN" means that you can find the right solution to provide reliable operation for most any requirement.

Heating and hot water service systems

Circulator pumps for circulation of hot water in central and district systems and circulation in domestic hot water service systems.

Cooling and airconditioning systems

Circulator pumps for circulation of cold water and other liquids in cooling and airconditioning systems.

Pressure boosting and liquid transfer

Vertical and horizontal centrifugal pumps and pressure boosting systems for liquid transfer and boosting hot and cold water.

Industrial applications

A wide range of pumps for the transfer of water, cooling lubricants and other liquids in industrial and process systems.

Dosing

Dosing pumps for wastewater treatment systems, swimming pools and industry.

Domestic water supply

Submersible pumps, jet pumps, multistage centrifugal pumps and compact systems for water supply in homes, gardens and hobby applications.

Environmental applications

Purpose-built submersible pumps for remedial pumping of contaminated groundwater and for sampling for water quality analyses.
