Copper Conductor Wires & Cables

SETAREH YAZD Wire & Cable Co.

Flexible Wire with PVC Insulated

CU/PVC

Code: NYAF , H05V-K , H07V-K

Rated voltage : 300/500 V & 450/750 V

Reference standard : ISIRI (607) 02 , ISIRI (607) 06 , IEC 60227 , BS 6004
VDE 0250

Application : For internal wiring of switching boxes and electrical appliance.

For installation in conduits and tubes. Not for direct installation under plaster.

Construction :

1-Conductor: Fine stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084
or VDE 0295 class 5 .

2-Insulation : PVC/C

3-Color of insulation : red, blue , Yellow ,Green , black or As request

Technical Specification :

1-Max. conductor temperature : 70 °C

2-Conductor resistant : Refer to table (1)

3-Test voltage : For 300/500V: 2000 V ac for 5 min

For 450/750V: 2500 V ac for 5 min.

4-Current carrying capacity : refer to table (2)

5-Bending radius : Refer to table (3)

6-Permissible short circuit temperature : 160 °C

7-Flame retardant : acc. to IEC 60332-1

SETAREH YAZD CO.

SETAREH YAZD Wire & Cable Co.

Single & Multi Core Wire with PVC Insulated

CU/PVC

Code: NYA (re , rm) , H05V-U , H07V-U , H07V-R

Rated voltage : 300/500 V & 450/750 V

Reference standard : IEC 60227 , VDE 0281 , BS 6004 , ISIRI (607) 01 ,
ISIRI (607) 05

Application : Use for lighting and commercial building. Suitable for covered and dry places, use for fixed installation, in distribution panel, on and under plaster as laid in conduit, or on insulating support.

Construction : Insulated wire with solid or stranded copper conductors.

1-Conductor : Solid or Stranded plain annealed copper acc. to IEC 60228 or
ISIRI 3084 or VDE 0295 , class 1 & 2.

2-Insulation : PVC/C

3-Color of insulation : As request

Technical Specification :

1-Max. conductor temperature : 70 °C

2- Conductor resistant : Refer to table (1)

3-Test voltage : For 300/500V: 2000 V ac for 5 min

For 450/750V: 2500 V ac for 5 min.

4- Current carrying capacity : Refer to table (2)

5- Bending radius : Refer to table (3)

6- Permissible short circuit temperature : 160 °C

7- Flame retardant : acc. to IEC 60332-1

Single Core Flexible Cable with PVC Insulated and PVC Sheathed

Cu/PVC/PVC

Code: NYY , H1VV-F

Rated voltage : 0.6/1 KV

Reference standard : ISIRI 3569-1 , IEC 60502-1

Application : For indoor or outdoor in cable, duct or tray. These cables are suitable for switching boxes, industrial plants, and commercial buildings.

Construction : Insulated wire with solid or stranded copper conductors.

- 1- Conductor : Fine Stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084 or VDE 0295, Class 5
- 2- Insulation : PVC
- 3- Color of Insulation : Black (or as request)
- 4- Outer sheath : PVC

Technical Specification :

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 3.5 KV AC or 8.4 KV DC for 5 min.
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 160 °C
- 7- Flame retardant : acc. to IEC 60332-1

*The above data is approximate and subject to manufacturing tolerances

Multi Core Flexible Cable with PVC Insulated and PVC Sheathed

Cu/PVC/PVC

Code: NYMHY , H05VV-F

Rated voltage : 300/500 V

Reference standard : ISIRI (607) 53 , 60227 IEC 53 , BS 6500 , VDE 0250

Application : For the connection of lighting, kitchen appliances, domestic, office appliances, at low mechanical stresses. Not for the connection of heating appliances in connection with the hot parts. For use in dry and damp locations

Construction :

- 1- Conductor : Fine stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084 or VDE 0295 , class 5 .
- 2- Insulation : PVC /D , PVC/YI2 , PVC/TI2
- 3- Color of insulation : As request
- 4- Protective conductor : Green/Yellow (if any)
- 5- Assembly : Cores twisted together ,(with filler if necessary)
- 6- Outer sheath : PVC/ST5 , PVC/YM2 , PVC/TM2

Technical Specification :

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 1500 , 2000 V ac , for 5 min.
- 4- Current carrying capacity : refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 160 °C
- 7- Flame retardant : ac. to IEC 60332-1

Multi Core Flexible Cable with PVC Insulated and PVC Sheathed

Cu/PVC/PVC

Code: NYMHY , H05VV-F

Rated voltage : 300/500 V

Reference standard : ISIRI (607) 53 , 60227 IEC 53 , BS 6500 , VDE 0250

Application : For the connection of lighting, kitchen appliances, domestic, office appliances, at low mechanical stresses. Not for the connection of heating appliances in connection with the hot parts. For use in dry and damp locations

Construction :

- 1- Conductor : Fine stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084 or VDE 0295 , class 5 .
- 2- Insulation : PVC /D , PVC/YI2 , PVC/TI2
- 3- Color of insulation : As request
- 4- Protective conductor : Green/Yellow (if any)
- 5- Assembly : Cores twisted together ,(with filler if necessary)
- 6- Outer sheath : PVC/ST5 , PVC/YM2 , PVC/TM2

Technical Specification :

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 1500 , 2000 V ac , for 5 min.
- 4- Current carrying capacity : refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 160 °C

Multi Core Cable with PVC Insulated & PVC Sheathed 2, 3, 4 and 5 Cores

NYM- O (re , rm) , NYM – J (re , rm)

Code: CU/PVC/PVC

Rated voltage : 300/500 V

Reference standard : 60227 IEC 10 , ISIRI (607) 10

Application : For fixed installation, indoors and outdoors, in cable duct , In ground and water, Used for electric network, industrial plants and switchgear.

Construction :

- 1- Conductor : Solid or Stranded plain annealed copper acc. to IEC 60228
or ISIRI 3084 or VDE 0295, class 1& 2 .
- 2- Insulation : PVC /C , PVC/YI1 , PVC/TI1
- 3- Color of insulation : As request
- 4- Inner covering : Extruded PVC
- 5- Outer sheath : Black PVC/ST4 , PVC/YM1 , PVC/TM1

Technical Specification :

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 2000 V ac for 5 min.
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 160 °C
- 7- Flame retardant : acc. to IEC 60332-1

Multi Core Flexible Power Cable with PVC Insulated & PVC Sheathed

Cu/PVC/PVC

Code: NYY-J , NYY-O , H1VV-F

Rated voltage : 0.6/1 KV

Reference standard : ISIRI 3569-1 , IEC 60502-1

Application : For indoor or outdoor in cable duct or tray. These cable are suitable for switching boxes, industrial plants, and commercial buildings. These cables are suitable for direct burial if there is no mechanical stresses.

Construction :

- 1- Conductor : Fine stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084 or VDE 0295 , class 5
- 2- Insulation : PVC /A
- 3- Color of insulation : As request
- 4- Protective conductor : Green/Yellow (if any)
- 5- Assembly : Cores twisted together ,(with filler if necessary)
- 6- Inner covering : PVC
- 7- Outer sheath : PVC/ST1 , PVC/YM3 , PVC/TM3

Technical Specification :

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 3.5 KV AC or 8.4 KV DC for 5 min
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 160 °C
- 7- Flame retardant : ac. to IEC 60332-1

Cu/PVC/PVC

Code: NYSLY

Rated voltage : 300/500 V

Reference standard : 60227 IEC 75 ,VDE 0250 , ISIRI (607) 75

Application : For use in dry, damp and wet places, as measurement and control cables for internal installations where there are no mechanical stresses, in machinery, production lines and control equipments.

Construction :

- 1- Conductor : Fine stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084 or VDE 0295 , class 5 .
- 2- Insulation : PVC / D
- 3- Core identification : Black with numbered
- 4- Protective conductor : Green/Yellow (if any)
- 5- Assembly : Cores twisted together ,(covered with PP tape or PET if necessary)
- 6- Outer sheath : PVC / ST9

Technical Specification :

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 2000 V ac for 5 min.
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 160 °C
- 7- Flame retardant : acc. to IEC 60332-1

SETAREH YAZD Wire & Cable Co.

SETAREH YAZD Wire & Cable Co.

CU/PVC/CWB/PVC

Code: NYCY , HO5VC4V-K , NYSLCY-J , NYSLCY-O

Rated voltage : 300/500 V

Reference standard : 60227 IEC 74, VDE 0250

Application : For use in dry, damp and wet places, where a protection against electromagnetic effects is necessary, as measurement and control cables for internal installations where there are no mechanical stresses, in machinery, production lines and control equipments.

Construction :

- 1- Conductor : Fine stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084 or VDE 0295 , class 5 .
- 2- Insulation : PVC/D
- 3- Core identification : Black with numbered
- 4- Protective conductor : Green/Yellow (if necessary)
- 5- Assembly : Cores twisted together ,(covered with PP tape or PET if necessary)
- 6- Screen : Tinned or plain annealed copper wire braid
- 7- Outer sheath : PVC /ST9

Technical Specification:

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 2000 V ac for 5 min.
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 160 °C
- 7- Flame retardant : acc. to IEC 60332-1

Single Core Power Cables with PVC Insulated & PVC Sheathed

NYY-re , NYY-rm

Code: CU/PVC/PVC

Rated voltage : 0.6/1 KV

Reference standard : IEC 60502- 1 , BS 6346 , ISIRI 3569-1 , VDE 0271

Application : For fixed installation, indoors and outdoors, in cable duct , In ground and water, Used for electric network, industrial plants and switchgear.

Construction :

- 1- Conductor: Solid or Stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084 or VDE 0295, class 1& 2
- 2- Insulation : PVC/A
- 3- Color of insulation : As request
- 4- Inner covering : Extruded PVC
- 5- Outer sheath : Black PVC/ST1

Technical Specification:

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 3.5 KV ac or 8.4 KV dc for 5 min.
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 160 °C
- 7- Flame retardant : acc. to IEC 60332-1

SETAREH YAZD Wire & Cable Co.

SETAREH YAZD Wire & Cable Co.

Single & Multi Core Wire Armored Cables with PVC Insulated & PVC Sheathed

CU/PVC/AWA/PVC (single core)
CU/PVC/SWA/PVC (Multi core)

Code: NYRY

Rated voltage : 0.6/1 KV

Reference standard : 60502 IEC - 1 , BS 6346 , ISIRI 3569-1 , VDE 0271

Application : PVC insulated and PVC sheathed wire armored cable for indoors and outdoors
in cable duct, underground and water, if greater mechanical protection is required.

Construction :

- 1- Conductor: Solid or Stranded plain annealed copper acc. To IEC 60228 or ISIRI 3084 or VDE 0295, class 1& class2
- 2- Insulation: PVC/A
- 3- Color of insulation : As request
- 4- Inner covering : Extruded PVC In sector shape cable , the cores covered with PP Tape
- 5- Armore : Aluminum wire armor for single core cables Galvanized Steel Wire armor for multi core cables
- 6- Outer sheath: Black PVC/ST1

Technical Specification:

- 1- Max. conductor temperature : 70 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 3.5 KV ac or 8.4 KV dc for 5 min.
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature ; 160 °C
- 7- Flame retardant : acc. to IEC 60332-1

CU/XLPE/AWA/PVC (single core)
CU/XLPE/SWA/PVC (Multi core)

Code: N2XRY

Rated voltage : 0.6/1 KV

Reference standard : IEC 60502- 1 , BS 6346 , ISIRI 3569-1 , VDE 0271

Application : XLPE insulated and PVC sheathed wire armored cable for indoors and outdoors, in cable duct, underground and water, if greater mechanical protection is required.

Construction :

- 1- Conductor : Solid or Stranded plain annealed copper acc. to IEC 60228 or ISIRI 3084 or VDE 0295, class 1 & 2
- 2- Insulation : XLPE
- 3- Color of insulation : As request
- 4- Inner covering : Extruded PVC Or In sector shape cable , the cores covered with PP Tape
- 5- Armored : Aluminum wire armor for single core cables, Galvanized Steel Wire armor for multi core cables
- 7- Outer sheath : Black PVC

Technical Specification:

- 1- Max. conductor temperature : 90 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 3.5 KV ac or 8.4 KV dc for 5 min.
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 250 °C
- 7- Flame retardant : acc. to IEC 60332-1

SETAREH YAZD Wire & Cable Co.

CU/XLPE/STA/PVC

Code: N2XBY

Rated voltage : 0.6/1 KV

Reference standard : IEC 60502- 1 , BS 6346 , ISIRI 3569-1 , VDE 0271

Application : XLPE insulated and PVC sheathed TAPE armored cable for indoors and outdoors, in cable duct, underground ,power plant and switchgear ,industrial plant and distribution systems. if greater mechanical protection is required.

Construction :

- 1- Conductor: Stranded plain annealed copper acc. To IEC 60228 or ISIRI 3084 or VDE0295, class 2
- 2- Insulation : XLPE
- 3- Color of insulation : As request
- 4- Inner covering : Extruded PVC Or In sector shape cable , the cores covered with PP Tape
- 5- Armore : Aluminum tape armor for single core cables
Galvanized Steel tape armor for multi core cables
- 6- Outer sheath : Black PVC

Technical Specification:

- 1- Max. conductor temperature : 90 °C
- 2- Conductor resistant : Refer to table (1)
- 3- Test voltage : 3.5 KV ac or 8.4 KV dc for 5 min.
- 4- Current carrying capacity : Refer to table (2)
- 5- Bending radius : Refer to table (3)
- 6- Permissible short circuit temperature : 250 °C
- 7- Flame retardant : acc. to IEC 60332-1

Aluminum Conductor Cables 0.6/1 KV

SETAREH YAZD Wire & Cable Co.

AL/PVC/PVC

Code: NAYY

Rated voltage: 0.6/1 KV

Reference standard: IEC 60502-1 , BS 6346 , ISIRI 3569-1 , VDE 0271

Application : For fixed installation, indoors and outdoors, in cable duct , In ground and water, Used for electric network, industrial plants and switchgear.

Construction:

- 1- Conductor: Stranded plain Aluminum acc. To IEC 60228 or ISIRI 3084 or VDE 0295, class 2
- 2- Insulation : PVC/A
- 3- Color of insulation : Black (or as request)
- 4- Outer sheath: Black PVC/ST1

Technical Specification:

- 1-Max. conductor temperature : 70 °C
- 2-Conductor resistant : Refer to table (1)
- 3-Test voltage : 3.5 KV ac or 8.4 KV dc for 5 min.
- 4-Current carrying capacity : Refer to table (2)
- 5-Bending radius : Refer to table (3)
- 6-Permissible short circuit temperature : 160 °C
- 7-Flame retardant : acc. to IEC 60332-1

SETAREH YAZD Co.

SETAREH YAZD Wire & Cable Co.

AL/PVC/AWA/PVC (single core)

AL/PVC/SWA/PVC (Multi core)

Code: NAYRY

Rated voltage : 0.6/1 KV

Reference standard : IEC 60502-1 , BS 6346 , ISIRI 3569-1 , VDE 0271

Application : PVC insulated and PVC sheathed wire armored cable for indoors and outdoors, in cable duct, underground and water, if greater mechanical protection is required.

Construction :

- 1-Conductor : Stranded plain Aluminum acc. to IEC 60228 or ISIRI 3084 or VDE 0295 class2
- 2-Insulation : PVC/A
- 3-Color of insulation : As request
- 4-Inner covering : Extruded PVC for round cables and In sector shape cables , the cores covered with PP Tape
- 5-Armore : Aluminum Wire armor (single core)
Galvanized Steel Wire armor (Multi core)
- 6-Outer sheath : Black PVC/ST1

Technical Specification :

- 1-Max. conductor temperature : 70 °C
- 2-Conductor resistant : Refer to table (1)
- 3-Test voltage : 3.5 KV ac or 8.4 KV dc for 5 min.
- 4-Current carrying capacity : Refer to table (2)
- 5-Bending radius : Refer to table (3)
- 6-Permissible short circuit temperature : 160 °C
- 7-Flame retardant : acc. to IEC 60332-1

Coaxial & Instrument Cables

SETAREH YAZD Wire & Cable Co.

High Frequency coaxial cables

505T3V, 705T3V

50 Ω & 75 Ω

Reference standard : JIS 3501

Construction :

- 1- Inner conductor : plain or tinned annealed copper**
- 2- Insulation : Solid or Foam Polyethylene**
- 3- Shield (outer conductor) : Copper wire braid**
- 4- Outer sheath : PVC or PE**

Technical Specification :

- 1- Operating Temperature : -20 °C to 70 °C**
- 2- Conductor resistant : acc. to JIS 3501**
- 3- Insulation resistance : Min. 1000 M Ω .Km**
- 4- Mutual capacitance : acc. to JIS 3501**
- 5- Attenuation : acc. to JIS 3501**
- 6- Characteristic impedance : 50 Ω & 75 Ω**

CU/PE/ISCR & OSCR/PVC

CU/PE/ISCR & OSCR/SWA/PVC

CU/XLPE/ISCR & OSCR/PVC

CU/XLPE/ISCR & OSCR/SWA/PVC

Reference standard : BS 5308 Part 1 & 2 , IEC 60288

Rated voltage : 300/500 V

Application :

For transmission analogue and digital signals. For use in signaling and data systems at power station, petrochemical plants, and in places that protection against external electrical fields and electromagnetic interference is necessary. These cables suitable for indoors and outdoors, on cable trays, in pipes or underground.

Construction :

1. **Conductor:** Annealed Copper conductor class 1,2,5 acc. to IEC 60228 , BS 6360
2. **Insulation:** PVC or PE or XLPE
3. **Core identification :** acc. to BS 5308
4. **Twisting :** The cores twisted together to form pair , triple and quad .
5. **Static screen :** Polyester tape + plain or tinned copper drain wire+ aluminum polyester tape (Al/PE) use as individual and overall screen .
6. **Inner sheath:** PVC or PE only for armored cables
7. **Armored:** Galvanized steel wire
8. **Sheath:** PVC , PE
9. **Color of sheath :** Black or as request

Technical Data:

- 1- **Temperature :** -40 °C to 70 °C
- 2- **Conductor resistance :** acc. to table (1)
- 3- **Max. short circuit temperature :** 160 °C
- 4- **Test voltage :** 1000 V r.m.s or 2400 V dc for 1 min.
- 5- **Insulation resistance :** Min. 5000 MΩ.Km
- 6- **Mutual capacitance at 1 KHz :** for one or two pair- 115 nf/Km and for other Cables 75 nf/Km
- 7- **L/R ratio :** acc. to BS 5308
- 8- **Min bending radius:** For non armored cables 7.5× cable ø & For armored cables 20× cable ø
- 9- **Flame retardant :** acc. to IEC 60332-1

Telecommunication Cables

SETAREH YAZD Wire & Cable Co.

J – Y(st)Y:

According To: VDE 0815

Application: Suitable for measurment & control in the fields of electronics.

This cable is also used for data transmission in computers. Suitable for fixed installiation in dry & humid premises.

Construction:

Conductor: Solid Plain annealed copper conductor

Insulation: Extruded PVC

Insulation Colour : Refer to table (9)

Core Warp: One layer of non-hygroscopic non-wicking, dielectric material (Overlap %30 or 10mm)

Nominal Diameter Of Earth Wire: 0.6 mm

Screen: A Single layer of aluminium fiol (Overlap %30 or 10mm)

Jacket: Extruded PVC

Color Jacket: Grey or White

A – 2Y(st)2Y:

According To: TCI

Application: These types of cables are used for connecting the distribution

Construction:

Conductor: Solid Plain annealed copper conductor

Insulation: Extruded HDPE, according to ASTM D 1248, type III class B, categories IV or V, grade E-8

Insulation Color : Refer to table (9)

Core Warp: One layer of non-hygroscopic non-wicking, dielectric material (Overlap %30 or 10mm)

Nominal Diameter Of Earth Wire: 0.6 mm

Screen: A Single layer of aluminium foil with a minimum thickness of 35 micron (Overlap %30 or 10mm)

Jacket: Extruded LDPE, according to ASTM D 1248, type I class C, categories IV or V, grade J-3

Color Jacket: Black

No. of pair × dia	Insulation Thickness (mm)	core dia. (mm)	pst.size	Alt.size	Sheath Thickness (mm)	Overall dia. approx. (mm)	Weight approx. (Kg/Km)

Aerial Bundled Cables – ABC

SETAREH YAZD Wire & Cable Co.

NFA2X

Reference standard : HD 626 S1 , NF C 33 – 209 , AS/NZ 3560-1 , EN 50397-1
BS EN 50183 , BS 7870-5 , 60502-1 IEC

Nominal voltage : 0.6/1 KV

Application: For overhead distribution lines , mainly for public distribution with
A highest voltage not above 1.2 KV

Construction :

- 1- Phase Conductor:** Aluminum EC grade 1350 H12-O , circular stranded compacted.
- 2- Null / Messenger:** AAAC , grade 6101 , circular stranded non-compacted. Or
ACSR (Aluminum Conductor Steel Reinforced) , or Messenger only
for 6 cores: Galvanized Steel wire
- 3- Lighting conductor:** Aluminum EC grade 1350 H12-O , circular stranded compacted.
- 4- Insulation:** Black XLPE type TIX5

Technical specification :

- 1- Operating temperature :** - 40 °C to +80 °C
- 2-Conductor resistant :** Refer to table (1)
- 3-Max. resistivity of aluminum grade 1350 :** 0.02808 $\Omega\text{mm}^2/\text{m}$
- 4- Max. resistivity of alloy aluminum grade 6101 :** 32.53 $\text{n}\Omega.\text{m}$
- 5-Spark Test Voltage :** (4500+7500 t) V dc (t : insulation thickness)
Or (3000+5000 t) V ac (t : insulation thickness)
- 6-Current carrying capacity :** refer to table (2)
- 7-Bending radius :** Refer to table (3)
- 8-Permissible short circuit temperature :** 250 °C

Technical Information

Technical Information

General Information:

Selecting a power cables:

The following factors are important when selecting a suitable cables construction which is required:

- Maximum operating voltage
- Insulation type
- Frequency
- Load to be carried
- Voltage drop
- Length of line
- Mode of installation
- Under ground (direct or in ducts)
- In air
- Magnitude and duration of possible overload
- Magnitude and duration of short circuit current
- Max. and Min. ambient air temperature and soil temperature
- Chemical and physical properties of soil
- Specification and requirements to be met

Weight and Dimension:

Weight and Dimension characteristics are approximate. The deviations are due to manufacturing tolerances.

Electrical Parameters of the Cables:

Voltages :

The standard rated voltage is denoted by $U_0 / U (U_m)$, where :

U_0 is the rated voltage between conductor and earth or metallic screen

U is the rated voltage between conductors

U_m is the maximum continuously permissible operating voltage of cable at any time or In any part of the network

U_0 / U	300/500 V	450/750 V	0.6/1 KV	3.6/6 KV	6/10 KV	8.7/15 KV	12/20 KV	18/30 KV
U_m	600V	900 V	1.2 KV	7.2 KV	12 KV	17.5 KV	24 KV	36 KV

Note : Cable design for 6/10 and 18/30 KV is applicable for 6.35/11 and 19/33 KV respectively.

Technical Information

DC Resistance of conductor :

The maximum DC resistance values of conductors at 20 °C are as per IEC 60228 or ISIRI 3084 .
DC resistance per unit length of the conductor at other temperature is given by :

$$R = R_0 [1 + \alpha_{20} (t - 20 \text{ }^{\circ}\text{C})]$$

Where : R DC resistance at temperature t °C Ω/Km

R₀ DC resistance at temperature 20 °C Ω/Km (given in table 1)

t Conductor temperature °C

α₂₀ Temperature coefficient at 20 °C 1/°C

For copper conductor α₂₀ = 0.00393

For aluminum conductor α₂₀ = 0.00403

AC Resistance of Conductor :

The AC resistance per unit length of the conductor (effective resistance) at its maximum operating temperature is made up of the DC resistance at this temperature and the extra resistance which takes into account additional losses caused by the current displacement in the conductor (skin effect, proximity effect), eddy currents in the metal sheath of screen and eddy currents as well as magnetic reversal in the armor. The AC resistance is given in the table 13.

Inductance:

The values of the inductance for both multi cores and three single core cables have been calculated based on the following presumption

$$L = k + 0.2 \ln (2S / d) \text{ mH/Km}$$

Where : L inductance

K a constant relating to the conductor formation.

d conductor diameter (mm)

S axial spacing between conductors for cables in trefoil formation (mm) and ,
1.26 x axial spacing between conductors for cables in flat formation (mm)

Capacitance :

The values of capacitance for cables have been calculated based on the following presumption :

$$C = \frac{\epsilon}{18 \ln (D/d)} \text{ } \mu\text{F/Km}$$

Where : ε relative permittivity of insulation

D outer diameter of insulation (mm)

d Conductor diameter (mm)

Charging Current :

The charging current is the capacitive current which flows when AC voltage is applied to the cable as a result of the capacitance between the conductors and earth and, for multi core cable in which the individual cores are not screened , between conductors. The value can be derived from the equation: $I_C = U_0 \omega C 10^{-6}$

Technical Information

Where : U_0 voltage between phase and earth (V)
 $\omega = 2\pi f$
 f frequency (Hz)
 C Capacitance to neutral ($\mu F/Km$)

Dielectric Losses :

The dielectric losses of an AC cable are proportional to the capacitance , the frequency, the phase voltage and the power factor. They are given by :

$$D = (2\pi f C U_0^2 \tan \delta) \times 10^{-6} \text{ watt/Km/phase}$$

Where : f frequency (Hz)
 C Capacitance to neutral ($\mu F/Km$)
 U_0 Voltage between phase and earth (V)
 $\tan \delta$ Dielectric power factor

Voltage Drop :

When current flows in a cable , conductor there is a voltage drop between the ends of the conductor which is the product of the current and the impedance . The following equations should be used to calculate the voltage drop :

1- Single phase system

$$V_d = 2 (R \cos \varphi + X \sin \varphi) \text{ mV/amp/meter}$$

2- Three phase system

$$V_d = \sqrt{3} (R \cos \varphi + X \sin \varphi) \text{ mV/amp/meter}$$

Where :

V_d : Voltage drop mV/amp/meter

R : AC resistance of conductor at a maximum conductor temperature Ω/Km

X : Inductive reactance of cable Ω/Km

$\cos \varphi$: Power factor of load

Voltage drop values are given in table 11

Permissible Short Circuit Capacity :

The permissible short – circuit current as presented in table 2 are calculated in accordance with IEC 60724 , which are based on the following conditions :

- 1- Short circuit starts from the maximum operating temperature
- 2- Maximum temperature during short circuit

$$XLPE = 250^\circ C$$

$$PVC = 160^\circ C$$

- 3- Maximum short circuit current duration is 5 seconds .

The short circuit current (I) shall be calculated from the formula

Technical Information

$$I^2 = (K^2 \times S^2 / T) \times \ln ((\theta 1 + \beta) / (\theta 2 + \beta)) \quad (A)$$

Where :

I = short circuit current (A)

T = Duration of short circuit (Sec)

K = Constant for the material of the conductor

S = Area of conductor (mm²)

$\theta 1$ = Final temperature (°C)

$\theta 2$ = initial temperature (°C)

β = Reciprocal of the temperature coefficient of resistance (α) of the conductor.

Current Rating Factors (Bellow 1 to 6) :

1- Rating Factors K for variation in GROUND temperature

Ground temperature °C	20	25	30	35	40	45	50	55
PVC insulation rated 70 °C	1.0	0.95	0.90	0.84	0.78	0.71	0.63	0.54
PVC insulation rated 90 °C	1.0	0.96	0.92	0.87	0.83	0.78	0.73	0.67
XLPE insulation rated 90 °C	1.0	0.96	0.92	0.88	0.88	0.79	0.75	0.70

2- Rating Factors K for variation in AIR temperature

Air temperature °C	25	30	35	40	45	50	55
PVC insulation rated 70 °C	1.07	1.0	0.93	0.87	0.79	0.70	0.61
PVC insulation rated 90 °C	1.04	1.0	0.95	0.90	0.85	0.80	0.74
XLPE insulation rated 90 °C	1.04	1.0	0.96	0.91	0.87	0.82	0.76

3- Rating Factors K for variation in GROUND depth

Depth of Laying (m)	0.6	0.7	0.8	0.9	1.0	1.1	1.2
K	1.05	1.03	1.02	1.01	1.0	0.99	0.98

4- Rating Factors K for variation in SOIL RESISTIVITY

Soil Resistivity (°C .Cm/W)	80	90	100	120	150	200	250
K	1.17	1.12	1.07	1.0	0.91	0.80	0.73

Technical Information

5- Trefoil or Flat formation rating factors for three single core cables laid direct in ground :

Number of Circuit	Touching		Spacing = 15 Cm		Spacing = 30 Cm	
	Trefoil	Flat	Trefoil	Flat	Trefoil	Flat
NR						
2	0.77	0.80	0.82	0.85	0.88	0.91
3	0.66	0.69	0.73	0.76	0.80	0.83
4	0.60	0.63	0.68	0.71	0.74	0.77
5	0.56	0.59	0.64	0.67	0.72	0.75
6	0.53	0.57	0.61	0.64	0.70	0.73

6- Trefoil or Flat formation rating factors for Multi core cables laid direct in ground :

Number of Circuit	Touching		Spacing = 15 Cm		Spacing = 30 Cm	
	Trefoil	Flat	Trefoil	Flat	Trefoil	Flat
NR						
2	0.81	0.81	0.87	0.87	0.91	0.91
3	0.69	0.70	0.76	0.78	0.82	0.84
4	0.62	0.63	0.72	0.74	0.77	0.81
5	0.58	0.60	0.66	0.70	0.73	0.78
6	0.54	0.56	0.63	0.67	0.70	0.76

Technical Information

Technical Information

Table (3) : Minimum Bending Radius during installation

1- Cable for Fixed wiring

Insulation	Conductor	Construction	Outer dia. (mm)	Min. Radius
PVC	Aluminum or Copper , solid circular or stranded	Unarmored	Up to 10	3 D
			10 – 25	4 D
		Armored	Above 25	6 D
			Any	6 D

2- PVC and XLPE insulated cables up to 3.6 KV

Insulation	Conductor	Construction	Outer dia. (mm)	Min. Radius
PVC and XLPE	Aluminum or Copper , solid circular or stranded	Armored or Unarmored	Any	8 D

3- XLPE insulated cables for 6 up to 30 KV

Type of Cable	Minimum Radius	
	During laying	Adjacent to joints or terminations
Single core		
- Unarmored	20 D	15 D
- Armored	20 D	12 D
Three core		
- Unarmored	15 D	12 D
- Armored	12 D	10 D

Maximum Tensile Forces During Laying

Maximum tensile force when pulling by cable stocking :

$$F = A \times 30 \text{ N/mm}^2$$

Cables with Aluminum conductor

$$F = A \times 50 \text{ N/mm}^2$$

Cables with Copper conductor

But The maximum value is 8500 N

Maximum tensile force when pulling by eye attached to the conductors :

$$F = A \times 30 \text{ N/mm}^2$$

Cables with Aluminum conductor

$$F = A \times 50 \text{ N/mm}^2$$

Cables with Copper conductor

Where A is the total cross section area of conductors (mm²)

500	0.08	0.16	0.15	0.20

age drop in a circuit of which the cable forms a part, should not exceed 3 – 5 % of the voltage, e.g. 20.0 volts (5%) for a three phase 400 volts supply. For any cable length ed to multiplied by the length of the cable (in meter) and by the current (in Ampere).

for the calculated voltage drop in $mV/A/m$:

$$= \frac{\text{permissible voltage drop}(e) \times 1000}{\text{current}(A) \times \text{length}(m)}$$

Technical Information

AWG Conversion table

Table (12): American Wire Gauge

AWG No.	Dia. mm	Area mm ²		AWG No.	Dia. mm	Area mm ²

10	2.588	5.262		750 MCM	22.0	380

mil : Unit of measure equal to 1/1000 of an inch.

Circular mil (Cmil) : A unit of area equal to the area of a circle whose diameter is 1 mil (0.001 inch). Used chiefly in specifying cross-sectional areas of round conductors.

Kcmil : Thousand circular Mils (MCM)

1 MCM = 1000 Cmil = 1 Kcmil = 0.5067 mm²

1 mil = 0.001 inch = 0.0254 mm

1 Cmil = (1 mil)²

Abbreviations used for Wire and Cable Standards

ISIRI	Institute of Standards and Industrial Research of IRAN
ANSI	American National standards Institute (USA)
AS	Australian Standard (Australia)
ASTM	American standard of Testing Materials (USA)
BASEC	British Approvals Service for Electric Cables (UK)
BSI	British Standard Institution (UK)
CEBEC	Comite Electrotechnique Belge (Belgium)
CEI	Commission Electrotechnico Italiano (Italy)
CEN	Comite Europeen de Normalisation Electrotechniques (European Committee for Standardization)
CENELEC	European Committee for Electrotechnical Standardization (Comite Europeen de Normalisation ELECTrotechnique)
CSA	Canadian Standards Association (Canada)
DEMKO	Denmark Elektriske Material Kontrol (Denmark)
DIN	Deutsches Institut für Normung (Germany)
DNV	Det Norske Veritas (Scandinavia)
ELOT	Hellenic Organization for Standardization (Greece)
EN	European Standards (Germany)
ERA	Electrical Research Association (UK)
FAR	Federal Air Regulation (USA)
GOST	Russia Standards
HD	Harmonized- Document (International)
ICEA	Insulated Cable Engineers Association (USA)
IEC	International Electrotechnical Commission (International)
IEE	Institute of Electrical Engineer (UK)
IEEE	Institute of Electrical and Electronic Engineers (UK)
ISO	International Standards Organization (International) or (International Organization for Standardization)
KEMA	Keuring Van Elektrotechnische Materialen (Netherlands)
LLOYDS	Lloyds Register of Shipping (UK)
MESC	Material and Equipment Standards and Code (Shell BV)(Netherlands)
MIL	Military Specification (USA)
NEC	National Electrical Code (USA)
NEMA	National Electrical Manufacturers Association (USA)
NEMKO	Norges Elektriske Materiell kontroll (Norway)
NFC	Normes Francaises Class C (France)
NP	IPQ –Instituto Portugues Da Qualidade (Portugal)
NSAI	National Standards Authority of Ireland (Ireland)
OVE	Osterreichischer Verband für Elektrotechnik (Austria)
SEMKO	Svenska Elektriska Materiel Kontrollanstalten (Sweden)
SETI	Sahkotarkastuslatios (Elektriska Inspektoratet) (Finland)
SEV	Schweizerischer Elektrotechnischer Verein (Switzerland)
SNV	Schweizerischer Normen Verband (Switzerland)
UL	Underwriter Laboratories (USA)
VDE	Verband Deutscher Elektrotechniker (Germany)

Construction abbreviation

Construction Abbreviation

Cu	Copper
Al	Aluminum
Ti Cu	Tinned Copper
RM	Circular Stranded
SM	Shaped Stranded
RE	Solid Circular
RF	Flexible Circular
CWS	Copper Wire Screen
CTS	Copper Tape Screen
CBS	Copper Braid Screen
CWBS	Copper Wire Braid Screen
ISCR	Individual Screen
OSCR	Overall Screen
TCWB	Tinned Copper Wire Braid
CW	Communication Wire
ATA	Aluminum Tape Armor
GTA	Galvanized Tape Armor
STA	Steel Tape Armor
SWA	Steel Wire Armor
AWA	Aluminum Wire Armor
SWB	Steel Wire Braid
LC	Lead Cover
LSH	Lead Sheath
SC	Semi Conductive (Extrusion)
SCT	Semi Conductive Tape
WBT	Water Blocking Tape
SCWBT	Semi Conductive WBT
MGT	Mica Glass Tape
PET	Polyester Tape
Bd	Bedding
PVC	Poly Vinyl Chloride
PVCH	High Temperature PVC
PVC(OR)	Oil resistant PVC
LDPE	Low Density Polyethylene
HDPE	High Density Polyethylene
FPE	Foam PE
XLPE	Cross - Linked PE
EVA	Ethylene Vinyl Acetate
EPR	Ethylene Propylene Rubber
HEPR	Hard Grade EPR
SIR	Silicon Rubber
LSHF	Low Smoke Halogen Free
HFFR	Halogen Free Fire Retardant
NBR	Nitrile Butadiene Rubber
NBR - PVC	NBR with PVC compound
PCP	Poly Chloroprene (Neoprene) Rubber
CPE	Chlorinated Polyethylene
CSP	Chlorosulfonated polyethylene
PUR	Polyurethane rubber

Designation Code for Power Cables

Designation Code for Power Cables

1- Identifications of designation

N	DIN - VDE standard
(N)	Similar to DIN - VDE standard

2- Conductor materials

A	Aluminum conductor
-	Copper conductor

3 - Insulating materials

Y	PVC
2X	Cross - linked PE (XLPE)
2Y	Polyethylene
2G	Silicon Rubber
3G	EPR

4- Concentric Conductor (Screen)

C	Concentric conductor of copper
CW	Concentric conductor of copper in wave form
CE	Concentric conductor of copper over each Individual core
S	Screen of copper wires
SE	Screen of copper wires over each Individual core
(St)	Static screen (PET + D.W + Al foil)

5- Armoring

B	Steel tape armor
F	Flat steel wire armor
G	counter helix of galvanized steel tape
R	round steel wire armor

6- Metal Sheath material

K	lead sheath
KL	Aluminum sheath

7- Outer sheath material

Y	PVC
2Y	PE
4G	EVA
6G	CSP
8G	NBR
11Y	PUR

8- Protective Conductor

- J	With green - yellow
- 0	Without green - yellow

9- Conductor type

RM	circular Stranded conductor
SM	Sector Stranded conductor
RE	circular Solid conductor
SE	Sector Solid conductor
/V	Compact conductor

The List of Cable Standards

- **ISIRI**
- **IEC**
- **BSI**
- **BS EN**
- **VDE**
- **ASTM**

1) ISIRI Standards

- ISIRI (607) -1 : Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V – Part 1: General requirements
- ISIRI (607) – 2 : Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V – Part 2: Test methods
- ISIRI (607) – 3 : Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V – Part 3: Non-sheathed cables for fixed wiring
- ISIRI (607) – 4 : Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V – Part 4: sheathed cables for fixed wiring
- ISIRI (607) – 5 : Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V – Part 5: Flexible cables (cords)
- ISIRI (607) – 6 : Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V – Part 6: lift cables and cables for flexible connections
- ISIRI (607) – 7 : Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V – Part 7: Flexible cables screened and unscreened with two or more conductors
- ISIRI 1926 -1: Rubber insulated cables - Rated voltages up to and including 450/750 v – Part 1 : General requirements
- ISIRI 1926 -2 : Rubber insulated cables - Rated voltages up to and including 450/750 v – Part 2 : Test methods
- ISIRI 1926 -3 : Rubber insulated cables - Rated voltages up to and including 450/750 v – Part 3 : Heat resistance silicone insulated cables
- ISIRI 1926 -4 : Rubber insulated cables - Rated voltages up to and including 450/750 v – Part 4 : Cords and flexible cables
- ISIRI 1926 -5 : Rubber insulated cables - Rated voltages up to and including 450/750 v – Part 5 : Lifts cable
- ISIRI 1926 -6 : Rubber insulated cables - Rated voltages up to and including 450/750 v – Part 6 : Arc welding electrode cables
- ISIRI 1926 -7 : Rubber insulated cables - Rated voltages up to and including 450/750 v – Part 7 : Heat resistant ethylene-vinyl acetate rubber insulated cables

The List of Cable Standards

- ISIRI 1926 -8 : Rubber insulated cables - Rated voltages up to and including 450/750 v – Part 8 : Cords for applications requiring high flexibility
- ISIRI 3081 -1-1 : Tests on electric and optical fiber cables under fire conditions -
Part 1-1: Test for vertical flame propagation for a single insulated wire or cable – Apparatus
- ISIRI 3081 -1-2 : Tests on electric and optical fiber cables under fire conditions -
Part 1-2: Test for vertical flame propagation for a single insulated wire or cable - Procedure for 1 kW pre-mixed flame
- ISIRI 3081 -1-3 : Tests on electric and optical fiber cables under fire conditions -
Part 1-3: Test for vertical flame propagation for a single insulated wire or cable – Procedure for determination of flaming droplets / particles
- ISIRI 3081 -2-1 : Tests on electric and optical fiber cables under fire conditions -
Part 2-1 : Test for vertical flame propagation for a single insulated wire or cable – Apparatus
- ISIRI 3081 -2-2 : Tests on electric and optical fiber cables under fire conditions -
Part 2-2 : Test for vertical flame propagation for a single insulated wire or cable – Procedure for diffusion flame
- ISIRI 3081 -3-22 : Tests on electric and optical fiber cables under fire conditions -
Part 3-22 :
- ISIRI 3081 -3-24 : Tests on electric and optical fiber cables under fire conditions -
Part 3-24 : Test for vertical flame spread of vertically-mounted bunched wires or cables-Category C
- ISIRI 3081 -3- 25 : Tests on electric and optical fiber cables under fire conditions -
Part 3-25 : Test for vertical flame spread of vertically-mounted bunched wires or cables-Category D
- ISIRI 3084 : Conductors of insulated cables
- ISIRI 3569-1: Power cables with extruded insulation and their accessories for rated voltages from 1 kV ($U_m = 1,2$ kV) up to 30 kV ($U_m= 36$ kV) Part 1 : Cables for rated voltages from 1 kV ($U_m= 1,2$ kV) and 3 kV ($U_m=3,6$ kV)
- ISIRI 3569-2 : Power cables with extruded insulation and their accessories for rated voltages from 1 kV ($U_m = 1,2$ kV) up to 30 kV ($U_m= 36$ kV) Part 2 : Cables for rated voltages from 6 kV ($U_m= 7,2$ kV) up to 30 kV ($U_m=36$ kV)
- ISIRI 5525-1-1 : Common test methods for insulating and sheathing materials of electric cables and optical cables –
Part 1-1: Methods for general application – Measurement of thickness and overall dimensions – Tests for determining the mechanical properties
- ISIRI 5525-1-2 : Common test methods for insulating and sheathing materials of electric cables and optical cables –
Part 1-2: Methods for general application – Thermal ageing methods
- ISIRI 5525-1-3 : Common test methods for insulating and sheathing materials of electric cables and optical cables –
Part 1-3 : Methods for general application – Methods for determining the density – Water absorption tests – Shrinkage test
- ISIRI 5525-1-4 : Common test methods for insulating and sheathing materials of electric cables and optical cables –
Part 1-4 : Methods for general application – Test at low temperature
- ISIRI 5525-2-1 : Common test methods for insulating and sheathing materials of electric cables and optical cables –
Part 2-1 : Methods specific to elastomeric compounds – Ozone resistance , hot set and mineral oil immersion tests
- ISIRI 5525-3-1 : Common test methods for insulating and sheathing materials of electric cables and optical cables –
Part 3-1: Methods specific to PVC compounds – Pressure test at high temperature - Tests for resistance to cracking

The List of Cable Standards

- ISIRI 5525-3-2 : Common test methods for insulating and sheathing materials of electric cables and optical cables – Part 3-2: Methods specific to PVC compounds – Loss of mass tests – Thermal stability test
- ISIRI 5525-4-1 : Common test methods for insulating and sheathing materials of electric cables and optical cables – Part 4-1 : Methods specific to polyethylene and polypropylene compounds – Resistance to environmental stress cracking – Measurement of the melt flow index – Carbon black and / or mineral filler content measurement in polyethylene by direct combustion - Measurement of carbon black content by thermogravimetric analysis (TGA) – Assessment of carbon black dispersion in polyethylene using a microscope
- ISIRI 5525-4-2 : Common test methods for insulating and sheathing materials of electric cables and optical cables – Part 4-2 : Methods specific to polyethylene and polypropylene compounds – Tensile strength and elongation at break after conditioning at elevated temperature – Wrapping test after conditioning at elevated temperature - Wrapping test after thermal ageing in air - Measurement of mass increase – Long – term stability test – Test method for copper – catalyzed oxidative degradation
- ISIRI 5525-5-1 : Common test methods for insulating and sheathing materials of electric cables and optical cables – Part 5-1 : Methods specific to filling compounds – Drop point – Separation of oil – Lower temperature brittleness – Total acid number – Absence of corrosive components – Permittivity at 23°C – DC resistivity at 23°C and 100°C
- ISIRI 5525-6 : Common test methods for insulating and sheathing materials of electric cables. Pressure test at high temperature, tests for resistance to cracking
- ISIRI 5525-7 : Common test methods for insulating and sheathing materials Of electric Cables- Loss of mass test- Thermal stability test
- ISIRI 5526-1 : Electrical test methods for electric cables – Part 1 : Electrical test methods for cables, cords and wires for voltages up to and including 450/750 V.
- ISIRI 5526-2 : Electrical test methods for electric cables – Part 2 : Partial discharge test.
- ISIRI 5526-3 : Electrical test methods for electric cables – Part 3 : Test methods for partial discharge measurements on lengths extruded power cable.
- ISIRI 60331 (All parts) : Tests for Electric Cables Under Fire Conditions – Circuit Integrity
- ISIRI 60649 (All parts) : Calculation of Maximum External Diameter of Cables for Indoor Installations
- ISIRI 60853 (All parts) : Calculation of the Cyclic and Emergency Current Rating of Cables
- ISIRI 463-1 : Low-frequency cables and wires with PVC insulation and PVC sheath – Part 1 : General test and measuring methods
- ISIRI 463-2 : Low-frequency cables and wires with PVC insulation and PVC sheath – Part 2 : Cables in pairs, triples, quads and quintuples for inside installation
- ISIRI 463-3 : Low-frequency cables and wires with PVC insulation and PVC sheath – Part 3 : Equipment wires with solid or stranded conductor wires, PVC insulated , in singles, pairs and triples

The List of Cable Standards

2) IEC Standard

- IEC 60060-1 : High – voltage test techniques . part1:general definition and test requirements
- IEC 60092 (All parts) : Electrical Installations in ships
- IEC 60189 : Low-frequency cables and wires with PVC insulation and PVC sheath
- IEC 60227 (All parts) : Polyvinyl chloride insulated cables of rated voltages up to and including 450/750 V
- IEC 60228 : Conductors of insulated cables
- IEC 60229 : Electric Cables – tests on extruded over sheaths with a special protective function
- IEC 60230 : Impulse tests on cables and their accessories
- IEC 60245 : Rubber insulated cables – Rated voltages up to and including 450/750 v
- IEC 60287 : Electric cables. Calculation of the current rating. Part 3: sections on operating conditions. Section 2: Economic optimization of power cable size
- IEC 60331 (All parts) : Tests for electric cables under fire conditions. Circuit integrity.
- IEC 60332 (All parts) : Tests on electric cables under fire conditions
- IEC/TR 60334 : Calculation of d.c. resistance of plain and coated copper conductors of low-frequency cables and wires. Application guide
- IEC 60344 : Calculation of the resistance of plan and coated copper conductors of low frequency cables and wires- Application guide.
- IEC 60502 -1: Power cables with extruded insulation and their accessories for rated voltages from 1kV ($U_m=1.2kV$) up to 30kV ($U_m=36kV$)- Part 1: Cables for rated voltages of 1kV ($U_m=1.2kV$) and 3kV ($U_m=3.6kV$)
- IEC 60502-2 : Power cables with extruded insulation and their accessories for rated voltages from 1kV ($U_m=1.2kV$) up to 30kV ($U_m=36kV$). Part 2. Cables for rated voltages from 6kV ($U_m=7.2kV$) up to 30kV ($U_m=36kV$)
- IEC 60502-4 : Power cables with extruded insulation and their accessories for rated voltages from 1kV ($U_m=1.2kV$) up to 30kV ($U_m=36kV$). Part 4: Test requirements on accessories for cables with rated voltages from 6kV ($U_m=7.2kV$) up to 30kV ($U_m=36kV$)
- IEC 60598-1 : Single core , PVC insulated only ,450/750 stranded conductor
- IEC 60649 : Calculation of maximum external diameter of cables for indoor installations
- IEC 60754 (All parts)
- IEC 60811 (All parts) : Common test methods for insulating and sheathing materials of electric cables
- IEC 60840 (All parts) : Power cables with extruded insulation and their accessories for rated voltages above 30kV ($U_m=36kV$) up to 150kV ($U_m=170kV$). Test methods and requirements.
- IEC 60853 : Calculation of the cyclic and emergency current rating of cables
- IEC 60885 : Electrical test methods for electric cables
- IEC 60918 : PVC insulated ribbon cable with a pitch of 1.27 mm suitable for insulation displacement termination

The List of Cable Standards

- IEC 60979 : Wires for wire wrapping applications
- IEC 60986 : Short-circuit temperature limits of electric cables with rated voltages from 6kV ($U_m=7.2\text{kV}$) up to 30kV ($U_m=36\text{kV}$)
- IEC 61034 (All parts): Measurement of smoke density of cables burning under defined conditions
- IEC 61084 : Cable trunking and ducting systems for electrical installations
- IEC 61089 : Round wire concentric lay overhead electrical stranded conductors
- IEC 61138 : Cables for portable earthing and short-circuiting equipment
- IEC 61156 (All parts)
- IEC 61232 : Aluminium - clad steel wires for electrical purposes
- IEC 61316 : Industrial cable reels
- IEC 61442 : Test methods for accessories for power cables with rated voltages from 6kV ($U_m=7.2\text{kV}$) up to 30kV ($U_m=36\text{kV}$)
- IEC 62230 (All parts): Electric cables- Spark test method

3) BSI Standard

- BSI 215 : Aluminium conductors and aluminium conductors, steel-reinforced for overhead power transmission
- BSI 443 : Testing zinc coatings on steel wire and for quality requirements
- BSI 3242 : Aluminium alloy stranded conductors for overhead power transmission
- BSI 4545 : Methods for mechanical testing of steel wire
- BSI 4565 : Galvanized steel wire for aluminium conductors, steel-reinforced
- BSI 5099 : Spark testing of electric cables
- BSI 5308 : Control and instrumentation cables
- BSI 5467 : 600/1000 V and 1900/3300 V armoured electric cables having thermosetting insulation
- BSI 6004 : Electric cables – PVC insulated, non-armoured cables for voltages up to and including 450/750 V, for electric power, lighting and internal wiring
- BSI 6007 : Electric cables – Single core unsheathed heat resisting cables for voltages up to and including 450/750 V, for internal wiring
- BSI 6346 : 600/1000 V and 1900/3300 V armoured electric cables having PVC insulation
- BSI 6360 : Conductors in insulated cables and cords
- BSI 6387 :

The List of Cable Standards

- BSI 6500 : Electric cables – flexible cords rated up to 300/500 V, for use with appliances and equipment intended for domestic, office and similar environments
- BSI 6746 : PVC insulation and sheath of electric cables
- BSI 7655 : Insulating and sheathing materials for cables
- BSI 7870 : LV and MV polymeric insulated cables for use by distribution and generation utilities
- BSI 7884 : Copper and copper-cadmium stranded conductors for overhead electric traction and power transmission systems
- BSI 7888 : Test requirements on accessories for use on power cables of rated voltage from 3,6/6(7,2) kV up to 20,8/36(42) kV

4) BS – EN Standards

- BS EN 10002 : Tensile testing of metallic materials
- BS EN 10244 : Steel wire and wire products –Non-ferrous metallic coatings on steel wire
- BS EN 10257 : Zinc or zinc alloy coated non-alloy steel wire for armouring either power cables or telecommunication cables
- BS EN 12548 : Lead and alloys – lead alloy ingots for electric cable sheathing and for sleeves
- BS EN 50183 : conductors for overhead lines – aluminium-magnesium-silicon alloy wires
- BS EN 50189 : Conductors for overhead lines – zinc coated steel wires
- BS EN 50214 : Flat polyvinyl chloride sheathed flexible cables
- BS EN 50265 : Common test methods for cables under fire conditions – test for resistance to vertical flame propagation for a single insulated conductor or cable
- BS EN 50266 : Common test methods for cables under fire conditions – test for vertical flame spread of vertically-mounted bunched wires or cables
- BS EN 50267 : Common test methods for cables under fire conditions – tests on gases evolved during combustion of materials from cables
- BS EN 50268 : Common test methods for cables under fire conditions – measurement of smoke density of cables burning under defined conditions
- BS EN 50289 : Communication cables – specifications for test methods
- BS EN 50290 : Communication cables
- BS EN 50363 : Insulating, sheathing and covering materials for low voltage energy cables
- BS EN 50395 : Electrical test methods for low voltage energy cables
- BS EN 50397 : Covered conductors for overhead lines and the related accessories for rated voltages above 1 kV a.c. and not exceeding 36 kV a.c.

The List of Cable Standards

- BS EN 50441 : Cables for indoor residential telecommunication installations
- BS EN 50483 : Test requirements for low voltage aerial bundled cable accessories
- BS EN 60228 : Conductors of insulated cables
- BS EN 60811 : Insulating and sheathing materials of electric and optical cables — Common test methods
- BS EN 60889 : Hard drawn aluminium wire for overhead line conductors
- BS EN 61034 : Measurement of smoke density of cables burning under defined conditions
- BS EN 62230 : Electric cables — Spark-test method

5) VDE Standard

- VDE 0100 : Erection of power installations with nominal voltages up to 1000 V
- VDE 0102 : Short-circuit currents in three-phase a. c. systems
- VDE 0207 : Insulating and sheathing compounds for cables and flexible cords
- VDE 0250 : Cables, wires and flexible cords for power installation
- VDE 0253 : Heating cables
- VDE 0260 : Railway applications – Railway rolling stock cables having special fire performance – Thin wall
- VDE 0262 : XLPE insulated and PVC sheathed installation-cables with nominal voltage 0,6/1 kV
- VDE 0265 : Cables with plastic-insulation and lead-sheath for power installation
- VDE 0266 : Power cables with improved characteristics in the case of fire –Nominal voltages U_0/U 0,6/1 kV
- VDE 0271 : PVC-insulated and sheathed power cables for rated voltages up to and including U_0/U (U_m) 3,6/6 (7,2) kV
- VDE 0274 : Specifications for Insulated Conductor Bundles of overhead lines
- VDE 0276 : Power cables D Part 604: Power cables of nominal voltages U_0/U 0,6/1 kV with special fire performance for use in power stations
- VDE 0279 : Accessories for underground mining cables
- VDE 0281 : Cables of rated voltages up to and including 450/750 V and having thermoplastic insulation
- VDE 0282 : Cables of rated voltages up to and including 450/750 V and having cross-linked insulation
- VDE 0287 : Technical procedures for determining the conformity of harmonized cables and cords
- VDE 0289 : Definitions for cables, wires and flexible cords for power installations
- VDE 0292 : System for cable designation
- VDE 0293 : Identification of cores in cables and flexible cords by colours
- VDE 0295 : Conductors of insulated cables
- VDE 0298 : Application of cables and cords in power installations

The List of Cable Standards

- VDE 0299 : Calculation method on the basis of fictitious diameters for determination of dimensions of protective coverings for cables and flexible cords for power installations
- VDE 0303 : Test methods for evaluating resistance to tracking and erosion of electrical insulating materials used under severe ambient conditions
- VDE 0304 : Electrical insulating materials –Thermal endurance properties
- VDE 0306 : Guide for determining the effects of ionizing radiation on insulating materials
- VDE 0472 : Testing of cables, wires and flexible cords
- VDE 0473 : Non electrical test methods for low voltage energy cables; German version EN 50396:2005
- VDE 0482 : Method of test for resistance to fire of unprotected small cables for use in emergency circuits;
- VDE 0491 : Instrumentation and control systems important to safety – Classification of instrumentation and control functions
- VDE 0711 :
- VDE 0812 : Equipment wires and stranded equipment wires for telecommunication systems and data processing systems
- VDE 0813 : Switchboard cables for telecommunication and data processing systems
- VDE 0814 : Cords for telecommunication systems and information processing systems
- VDE 0815 : Cables for indoor residential telecommunication installations
- VDE 0816 : External cables for telecommunication and data processing systems
- VDE 0817 : Cables with stranded conductors for increased mechanical stress for telecommunications systems and data processing systems
- VDE 0818 : Self supporting telecommunication aerial cables on overhead power lines above 1 kV
- VDE 0819 : Multi-element metallic cables used in analogue and digital communication and control
- VDE 0855 : Cable networks for television signals, sound signals and interactive services

The List of Cable Standards

ASTM D1351	Standard Specification for Thermoplastic Polyethylene Insulation for Electrical Wire and Cable
ASTM F1837M	Standard Specification for Heat-Shrink Cable Entry Seals (Metric)
ASTM F1837M	Standard Specification for Heat-Shrink Cable Entry Seals (Metric) NO_PDF
ASTM D2526-97	Standard Specification for Ozone-Resisting Silicone Rubber Insulation for Wire and Cable
ASTM D2219-02	Standard Specification for Poly (Vinyl Chloride) Insulation for Wire and Cable, 60°C Operation
ASTM D2220-02	Standard Specification for Poly (Vinyl Chloride) Insulation for Wire and Cable, 75°C Operation
ASTM D2220-97	Standard Specification for Poly (Vinyl Chloride) Insulation for Wire and Cable, 75°C Operation
ASTM D6096-02	Standard Specification for Poly (Vinyl Chloride) Insulation for Wire and Cable, 90°C Operation
ASTM B736-00	Standard Specification for Aluminum, Aluminum Alloy and Aluminum-Clad Steel Cable Shielding Stock
ASTM D2802-98	Standard Specification for Ozone-Resistant Ethylene-Alkene Polymer Insulation for Wire and Cable
ASTM D2219-97	Standard Specification for Poly (Vinyl Chloride) Insulation for Wire and Cable, 60°C Operation
ASTM D3555-01	Standard Specification for Track-Resistant Black Crosslinked Polyethylene Insulation for Wire and Cable, 90°C Operation
ASTM D3555-98	Standard Specification for Track-Resistant Black Crosslinked Polyethylene Insulation for Wire and Cable.
ASTM B736-00	Standard Specification for Aluminum, Aluminum Alloy and Aluminum-Clad...
ASTM D1868-07	Standard Test Methods for Detection and Measurement of Partial Discharge
ASTM D2633-08	Standard Test Methods for Thermoplastic Insulations and Jackets for Wire
ASTM B694-03	Standard Specification for Copper, Copper-Alloy, Copper-Clad Bronze (CCB)
ASTM D4325-08	Standard Test Methods for Nonmetallic Semi-Conducting and Electrically
ASTM D6097-01	Standard Test Methods for Relative Resistance to Vented Water-Tree Growth
ASTM B786-08	Standard Specification for 19 Wire Combination unilay-Stranded Aluminum
ASTM D1531-06	Standard Test Methods for Relative permittivity (Dielectric Constant) and...
ASTM D2633-96	Standard Methods of Testing Thermoplastic Insulations and Jackets for Wire and Cable
ASTM A411-98	Standard Specification for Zinc-Coated (Galvanized) Low-Carbon Steel Armor Wire
ASTM F2321-03	Standard Specification for Flexible Insulated Temporary By-Pass Jumpers
ASTM A411-03	Standard Specification for Zinc-Coated (Galvanized) Low-Carbon Steel Armor Wire
ASTM D1531-01	Standard Test Methods for Relative Permittivity (Dielectric Constant) and Dissipation Factor by Fluid Displacement Procedures
ASTM D1531-95	Standard Test Method for Relative Permittivity (Dielectric Constant) and Dissipation Factor by Fluid Displacement Procedures
ASTM D1531-01	Standard Test Methods for Relative Permittivity (Dielectric Constant) and Dissipation Factor by Fluid Displacement Procedures
